

What's Up With Wayanad?

"Welcome to Wayanad, a beautiful district in Kerala known for its vibrant greenery and serene backwaters. But lately, things have been different..."

"This year, the monsoon rains were not as gentle as they used to be."

"Aaishi, do you think we'll be okay? The rains are getting worse."

"I don't know, Tashu. But we must stay prepared."

"The unrelenting rain turned streams into raging rivers, and unstable slopes, weakened by deforestation, collapsed into landslides"

Omg why is this happening?

"Wetlands are like big sponges that soak up rainwater. Without them, there's nowhere for the water to go, so it floods our homes and fields."

"Look, everyone is leaving! We have to do something!"

"Let's go help them, Tashu. We can't just stand by!"

Decades of deforestation have stripped the land of its natural defenses, making floods and landslides more destructive.

"We need more hands to help move people to safety!"

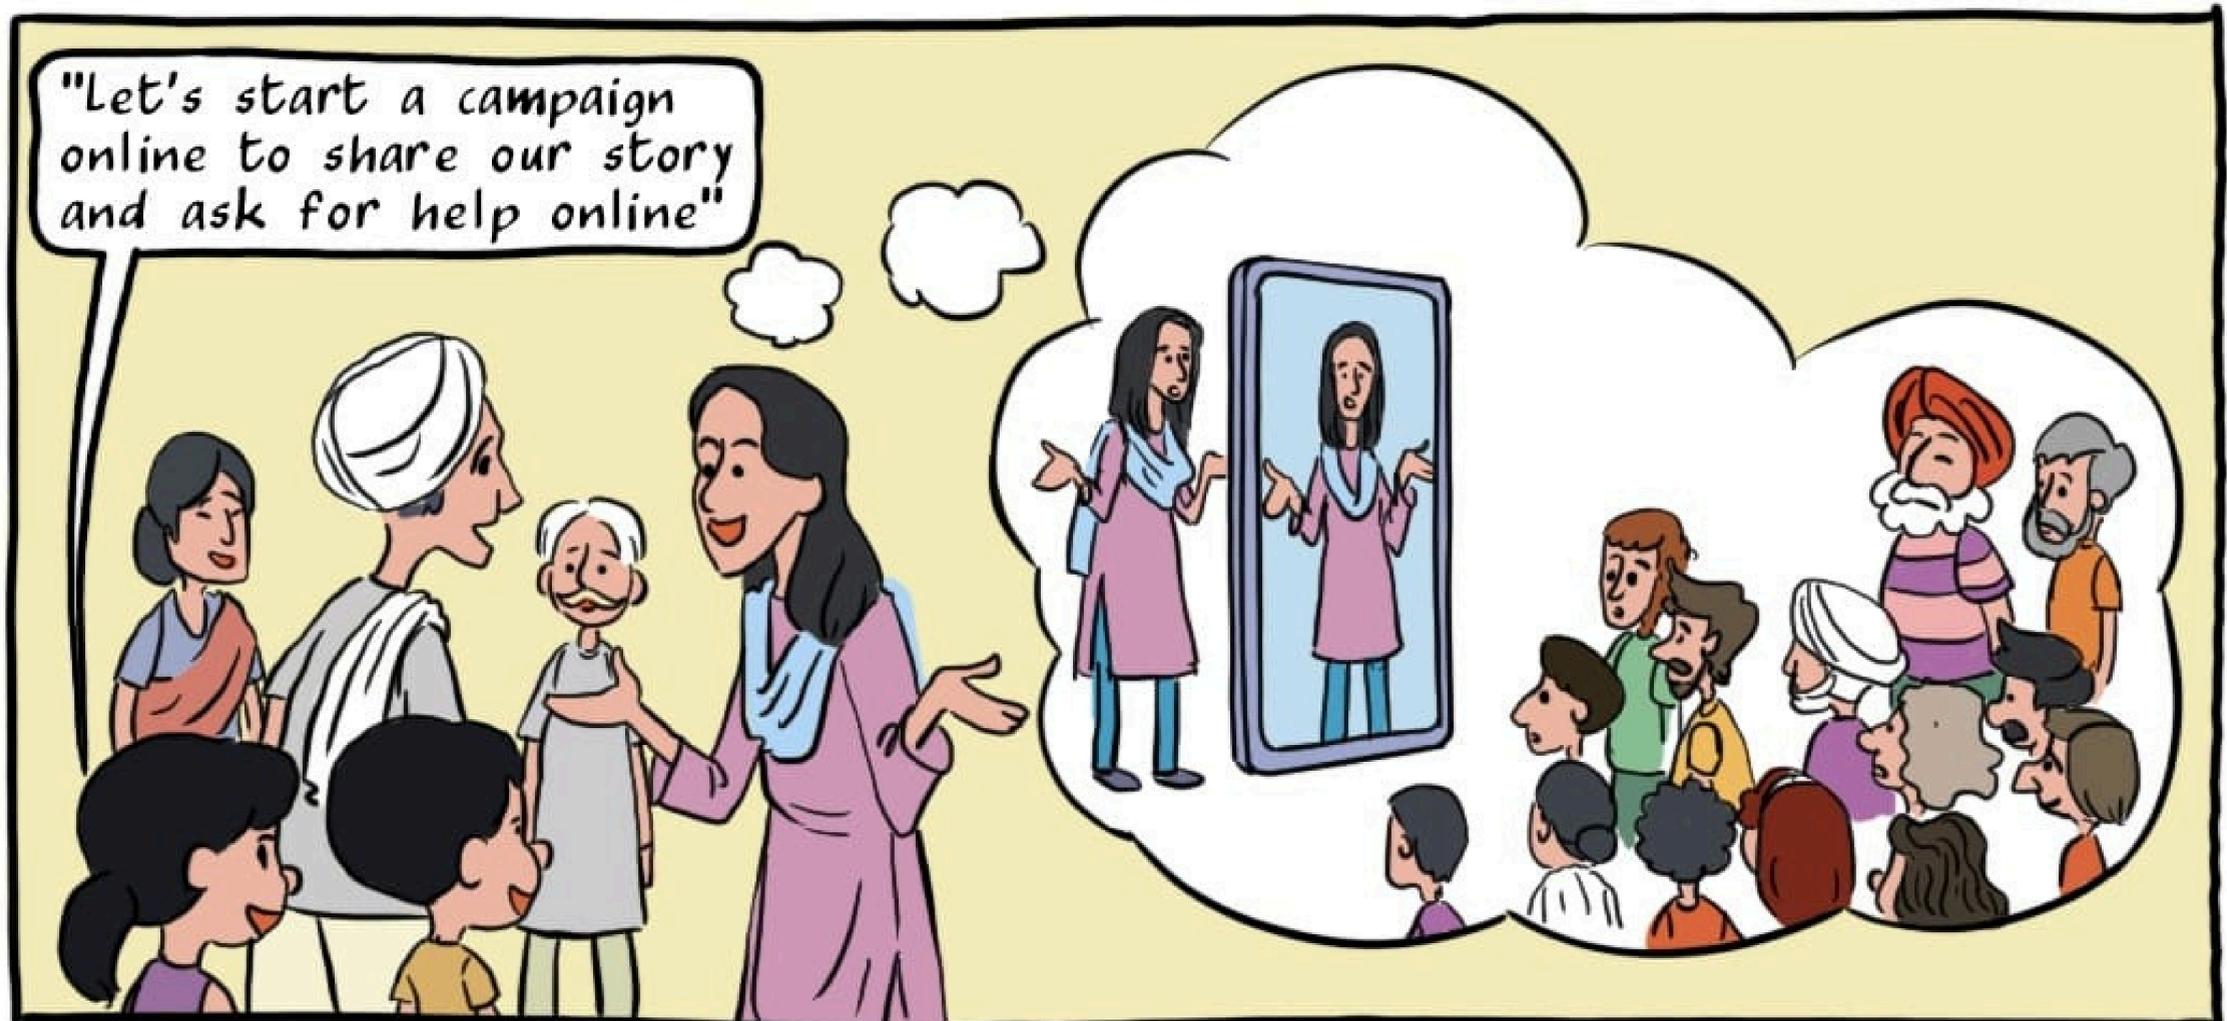

"Yes, let us go to that area"

"But the people of Wayanad didn't give up. They came together, united against the destructive forces of nature."

"Let's start a campaign online to share our story and ask for help online"

"After days of relentless rain, the sun shone again. The people of Wayanad began to rebuild, stronger and more united than before."

"Together, we can make a change. Let's rebuild not just our homes, but our relationship with nature."

"We may have lost a lot, but the most important gain is we were able to reach out to so many people highlighting the main cause behind such disaster- climate crisis. Now, we must act to protect our present and future."

"In every challenge, there is an opportunity to grow and learn. Wayanad has shown the real cruel face of climate crisis in India and the need for urgent action."
